

SWEEPERS

CSW 700B COURT

SWEeper FOR TENNIS AND PADEL COURTS

A single sweeper for cleaning PADEL AND TENNIS COURTS

This is the evolution of the Comet CSW 700B walk-behind sweeper, equipped with brushes and collection tray specifically modified for cleaning playing surfaces and redistributing sand on the court.

This innovative sweeper ensures quick and safe maintenance of padel courts, providing safe and hygienic conditions for players: in fact, it is equipped with a special collection tray complete with micro-holes for the uniform redistribution of sand, while retaining the dust and fluff released by the balls on the court.

The central and side brushes, on the other hand, sweep up both the coarse waste and sand that accumulates at the edge of the court, while neatly combing the synthetic turf fibres.

IDEAL FOR CLEANING SYNTHETIC COURTS OF:

Padel courts

Tennis courts

5-a-side soccer courts

Regular soccer courts

Perfect for **INDOOR** and **OUTDOOR** facilities

CSW 700B COURT is suitable for both synthetic turf and concrete surfaces.

AGILE AND VERSATILE FOR EVERY USE INCLUDING OFF THE COURT

Equipped with a 510mm wide central brush for sweeping up coarse dirt and troublesome ball fluff. Thanks to its soft bristles, it restores the synthetic turf to pristine condition.

It features a collection tank with microholes for redistributing sand and retaining coarse dirt restoring the court to its original condition.

Thanks to the side brush with which it is fitted even the sand at the edges of the court is easily swept up and redistributed on the court in a uniform manner.

Battery-powered (optional) it can be used without any problems in both indoor and outdoor facilities.

Optional collection container without holes, for cleaning all areas outside the court: driveways, parking lots, hospitality areas, all indoor and outdoor environments.

the small size of the CSW 700B COURT allows it to move in even the most confined spaces. What is more, by replacing the special tray equipped with microholes for padel courts with the standard collection container without holes (optional), it also becomes practical and effective for cleaning tennis courts and all sports centre environments such as clubhouses, bars, locker rooms, offices, driveways and parking lots, which are difficult to keep clean because of their size and the significant amount of dirt that often builds up due to bad weather conditions.

GENERAL FEATURES

Ideal for medium and large areas.

Large filtering area with electric filter shaker.

Side-brush lifting lever.

Suction shut-off switch.

Flap lifting system.

Panel filter in horizontal position.

Central brush pressure adjustment system.

Indirect rear collection.

Main brush quick release.

Long-lasting elastic straps.

Tilting handle.

Suction selection lever.

Traction lever.

Antistatic device.

Special collection container with microholes for the collection and redistribution of sand on padel and tennis courts.

Standard collection container without holes (optional).

Self-supporting steel frame.

Mechanically-operated side brush.

Battery and battery charger not included and to be ordered as optional equipment.

Non-marking side flaps.

Main brush with soft bristles.

TECHNICAL DATA

	CSW 700B COURT
code	39002-00134
width of main brush	510mm
cleaning width (with 1 side brush)	680mm
collection/emptying container	45 l.
hourly yield	2620 m ² /h
feed type	Mechanical
feed speed	4 km/h
motor type/power	12V / 400W
filtering surface	2 m ²
brush pressure	adjustable
filter shaker	electric
dimensions (cm)/weight	126x63x85 / 78kg

OPTIONAL ACCESSORIES

00080-05196
main brush with soft bristles

00054-01632
collection tray with microholes

TRAY WITH MICROHOLES

00056-00068
battery charger 12v 13a 220-240/50-60

00055-00149
12v 105ah c5 gel battery - low maintenance

00070-00427
14-micron paper panel filter

00080-04124
pp side brush

00005-02532
non-marking side flap

00054-01369
closed collection tray without microholes

00055-00130
12v 118ah c5 lead-acid tubular battery

HERE IS THE TESTIMONY OF PADEL ENTREPRENEURS WHO HAVE ALREADY TESTED THE MACHINE

"The surface of both the padel and tennis courts, immediately changed colour, regaining its original look where broom cleaning had served no useful purpose.

The speed and yield per sq.m/hr of the sweeper were incredible, especially as regards the fluff left by the balls: this was almost invisible on the court, but within minutes the collection tank was filled with it. At the same time, the redistribution of the collected sand via the perforated tray worked very well."
